16.2 Appendix B — Extra Figures	24

1 The Quarto Book

2 Welcome

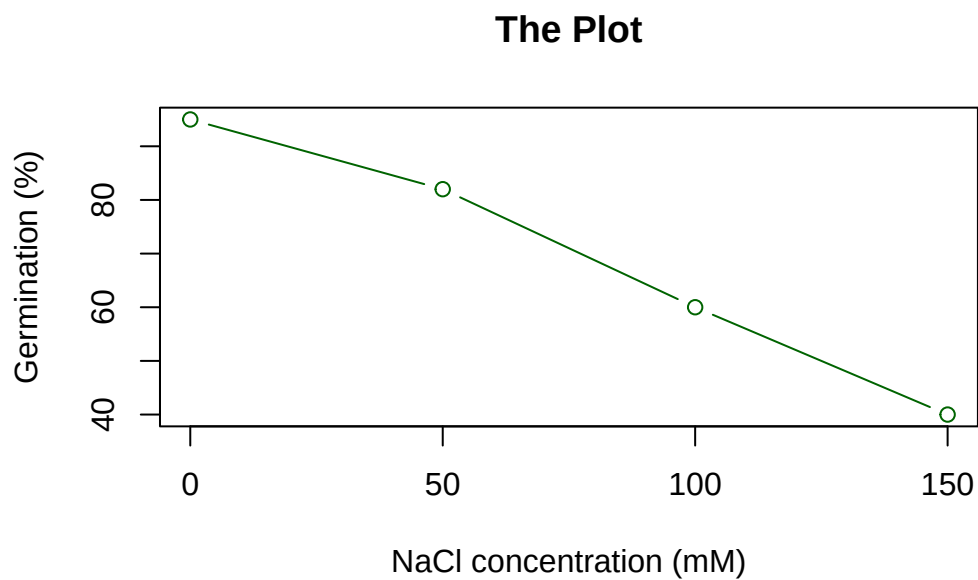

This is the homepage.

3 First draft

3.1 Introduction

Soil salinity affects germination and seedling growth

```
salinity <- c(0,50,100,150)
germination <- c(95,82,60,40)
plot(salinity, germination, type="b", col = "darkgreen",
     main="The Plot",
     xlab="NaCl concentration (mM)",
     ylab="Germination (%)")
```

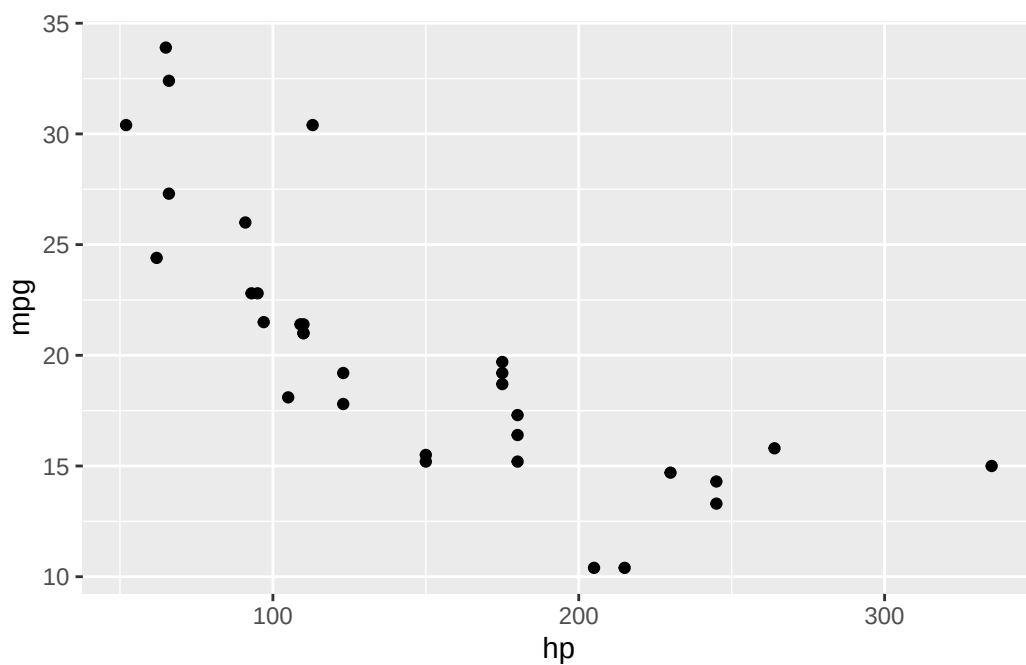

3.1.1 Figure Example: Salinity and Germination

```
#| label: fig-salinity #| fig-cap: "Effect of salinity on yard long bean germination" #| echo:
false #| message: false #| warning: false
```

```
library(ggplot2)
```

Warning: package 'ggplot2' was built under R version 4.4.3

```
ggplot(mtcars, aes(x = hp, y = mpg)) +
  geom_point()
```

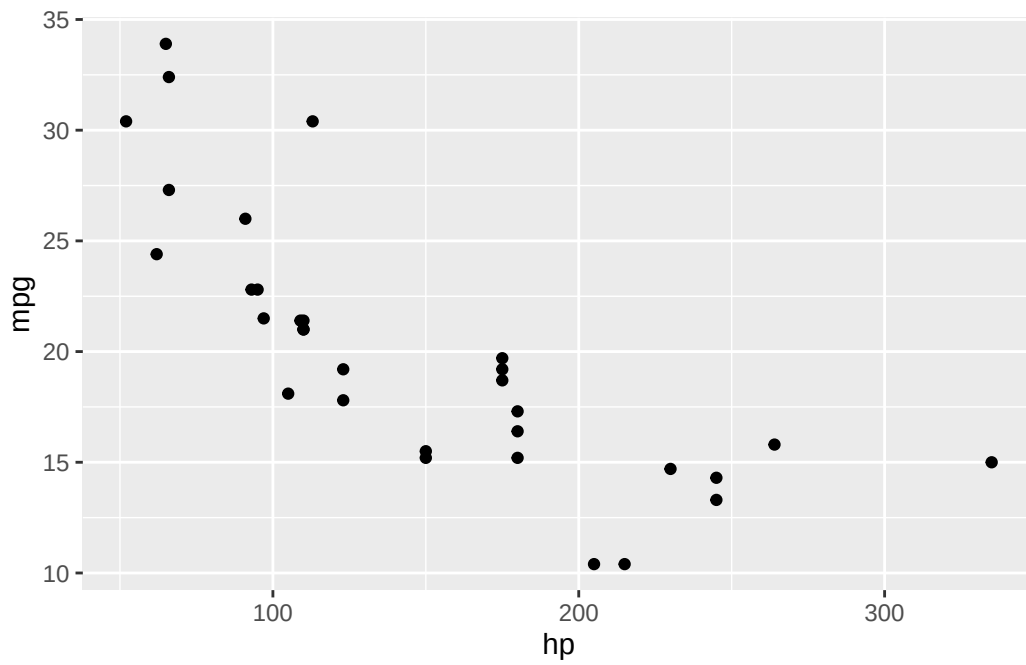

As shown in Figure ?@fig-salinity, germination decreases as salinity increases (see Figure ?@fig-salinity)

3.1.2 Figure Example: Salinity and Germination

```
#| label: fig-salinity #| fig-cap: "Effect of salinity on yard long bean germination" #| echo:
false #| message: false #| warning: false
```

```
library(ggplot2)

# Example plot
ggplot(mtcars, aes(x = hp, y = mpg)) +
  geom_point()
```

As shown in Figure ?@fig-salinity, germination decreases as salinity increases.
(see Figure ?@fig-salinity)

4 Quarto PDF TOC Test

5 Abstract

This is the abstract section.

6 Introduction

This is the introduction section.

6.1 Background

More details here.

7 Methods

Method section.

8 Results

Result section.

9 Day 5 Practice, (Reference and Cross reference)

9.1 Different ways to cite the text.

9.1.1 Example: 1

several studies show increase the productivity. [@s21113758]

9.1.2 Example: 2

For multiple citation: [@s21113758; @s18082674]

9.1.3 Example: 3

1. parenthetical: ... results ([@s18082674]).
2. Narrative: smith ([@s21113758]) found ...

9.2 Cross-reference figure and tables

```
x <- c(12,23,43,43,24,14)
y <- c(1,2,3,4,2,5)
plot(x,y)
```

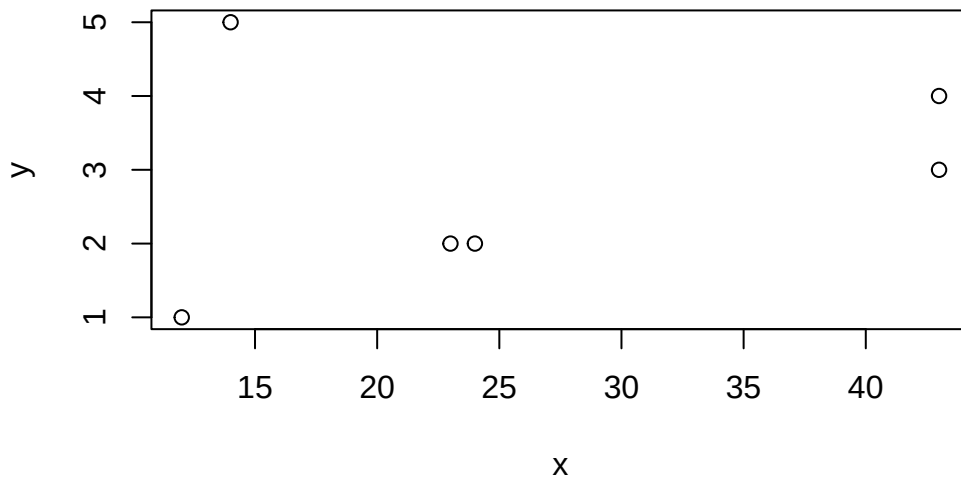

Figure 9.1: germination rate vs salinity

9.2.1 References in the text

Figure @ref(fig:salinity) shows that germination decreases with salinity.

9.3 Adding footnote to the document. This can be two types.

9.3.1 Inline footnotes

this is a inline footnote. ¹

9.3.2 Numaric footnotes

1. this is footnote no one. ²
2. this is footnote no two. ³

¹this footnote will show there in the line

²some things about the footnote 1

³some things about the footnote 2

Appendix

9.4 Appendix A — Raw Data

- here you can add the data you are analysis.

9.5 Appendix B — Extra Figures

- here you can add the chats and figure.

10 Research Report + Quarto document

10.0.1 all the quarto basic function will be apply here. Like-

- headline
- bold (**bold**, *italic*)
- Lists (-,* ,1.)
- links
- image
- code blocks
- equation block
- block quotes

10.0.1.0.1 The inline R code for dynamic text:

1. The avarage yield is `r mean(c(3,4,6,2,3,5,6))`

11 Research Report

11.1 Abstract

This will be the abstract

11.2 Introduction

This is the introduction section of a Paper. You can add anything here

And so on and on and on. The next target is to learn the cross referencing.

12 Yield Report (Template)

13 Yield Report (Parameterized Reports)

This report analyses **Yard Long Bean** for the year **2025** with fertilizer **Control**.

14 Quarto only executes R code if it detects at least one R chunk (like `{r}` ...).

```
2+2
```

```
[1] 4
```

15 this things will be add in the next slide.

##introduction - by this - by that

16 Apendix

Appendix

16.1 Appendix A — Raw Data

- here you can add the data you are analysis.

16.2 Appendix B — Extra Figures

- here you can add the chats and figure.
